

DevOps and Data Engineer modernizing Public Statistical Services

EXPERIENCE

- Ministry of the Interior** Paris, France
Data Scientist and IT Technical Referent 2024 - Present
Responsible for publications on economic and financial crime
 - Redesigned ETL processes for 20agents, reducing the delay between data acquisition and production by over 80%. Implemented incremental processing, data validation frameworks, and automated alerting.
 - Implemented a culture of change with modern tools and methods for a diverse audience in terms of adaptability, technical skills, and ambition.
 - Developed internal and open-source tools for the industrialized publication of articles and content for the general public, reducing technical debt and dependencies.
 - Co-designed, developed, and deployed LLM models to cluster free-text survey responses (*private* - *NDA*).
 - Wrote studies on economic and financial crime using data from the Police Nationale and Gendarmerie.
- INSEE** Nantes, France
DevOps Engineer 2021 – 2024
DevOps and support for INSEE's data science platform
 - Co-developed and installed the Platform As A Service (*Onyxia*).
 - Developed and implemented a new cutting-edge technical stack (Docker, Helm, GitLab and GitHub pipelines, Grafana, Prometheus, Vault, Ubuntu/Debian, S3) and accelerated production deployment of services by 10x.
 - Provided support to data scientists, from beginners to advanced, for integrating their services (notebooks, internal data visualization applications, IDEs: RStudio & PyCharm).
- INSEE** Nantes, France
Data Platform Engineer 2020 – 2021
System administrator for the internal data science platform
 - Implemented components enabling 500INSEE data scientists to save up to 80% of their time in deploying internal tools and studies.
 - Set up monitoring and supervision of processes to manage shared physical resources (Windows Server). Optimized resource usage by 20%.
 - Initiated projects to translate code to move away from a proprietary data analysis license that had been in place for 20 years.
- Central Statistics Office** Dublin, Ireland
End-of-studies Internship 2020
Statistical Assistant
 - Co-edited the official report on Ireland's annual statistics.
 - Developed specifications for the automatic reading of monthly meteorological records from over 250 years ago.

EDUCATION

- ENSAI** Rennes, France
Engineering Degree (MSc.) 2018 – 2021
 - Computer Science specialization - Big Data - optimization - economics (micro & macro) - class delegate
- Lycée Français Premier** Fontainebleau, France
Preparatory Classes for Grandes Écoles 2015 – 2018
 - MPSI* – *MP*: Mathematics - Physics - Engineering Sciences - Computer Science specialization - class delegate

TECHNICAL SKILLS

- **Programming:** Python, Java, JavaScript, TypeScript, R, Bash, Go
- **Infrastructure:** Docker, Kubernetes, Helm, CI/CD (GitLab, GitHub)
- **Databases:** PostgreSQL, DuckDB, MySQL
- **Cloud:** S3, Google Cloud Platform (GCP), Amazon Web Services (AWS)
- **Systems:** Linux (Ubuntu/Debian), Windows Server
- **Data Engineering:** Apache Airflow, Pandas, NumPy, Dask
- **ML/AI:** scikit-learn, TensorFlow, Transformers, HuggingFace, MLflow
- **DevOps:** Terraform, Ansible, Vault, ArgoCD, GitHub Workflows

LANGUAGES

- **French:** Native
- **English:** Bilingual
- **Spanish:** Fluent

PERSONAL PROJECTS AND INTERESTS

- **Real Estate Web Application:** Optimization between renting and buying a property with real parameters: *HabitatCalc*.
- **Tax Web Application:** Understanding marginal tax brackets on income and tax rates: *TrancheMaster*.
- **Conferences and Seminars:** *L’Etat dans le nuage 2026*, INSEE and Public Statistical Services Webinars 2024 to 2026, AI Salon 2023, KubeCon 2023, DevFest 2022 & 2023, VivaTech 2022
- **Sports:** Triathlon, volleyball, alpine skiing, bouldering
- **Music:** Piano (4 years), drums (10 years)
