

DevOps and Data Engineer modernizing Public
Statistical Services

EXPERIENCE

- Ministry of the Interior

Data Scientist and IT Technical Referent

Responsible for publications on economic and financial crime
 - Redesigned ETL processes for 20agents, reducing the delay between data acquisition and production by over 80%.
 - Implemented a culture of change with modern tools and methods for a diverse audience in terms of adaptability, technical skills, and ambition.
 - Developed internal and open-source tools for the industrialized publication of articles and content for the general public, reducing technical debt and dependencies.
 - Co-designed, developed, and deployed LLM models to cluster free-text survey responses (*private* - *NDA*).
 - Wrote studies on economic and financial crime using data from the Police Nationale and Gendarmerie.
 - INSEE

DevOps Engineer

DevOps and support for INSEE’s data science platform
 - Co-developed and installed the Platform As A Service (Onyxia).
 - Developed and implemented a new cutting-edge technical stack (Docker, Helm, GitLab and GitHub pipelines, Grafana, Prometheus, Vault) and accelerated production deployment of services by 10x.
 - Provided support to data scientists, from beginners to advanced, for integrating their services (notebooks, internal data visualization applications, IDEs: RStudio & PyCharm).
 - INSEE

Data Platform Engineer

System administrator for the internal data science platform
 - Implemented components enabling 500+ INSEE data scientists to save up to 80% of their time in deploying internal tools and studies.
 - Set up monitoring and supervision of processes to manage shared physical resources (Windows Server). Optimized resource usage by 20%.
 - Initiated projects to translate code to move away from a proprietary data analysis license that had been in place for 20 years.
 - Central Statistics Office

End-of-studies Internship
Statistical Assistant

Co-edited the official report on Ireland’s annual statistics.
Developed specifications for the automatic reading of monthly meteorological records from over 250 years ago.

Paris, France
2024 - Present

Nantes, France
2021 – 2024

Nantes, France
2020 – 2021

Dublin, Ireland
2020
- EDUCATION
- ENSAI

Engineering Degree (MSc.)

Computer Science specialization - Big Data - optimization - economics (micro & macro) - class delegate
 - Lycée François Premier

Preparatory Classes for Grandes Écoles

MPSI – MP: Mathematics - Physics - Engineering Sciences - Computer Science specialization - class delegate

Rennes, France
2018 – 2021

Fontainebleau, France
2015 – 2018

TECHNICAL SKILLS

- Programming:** Python, Java, JavaScript, TypeScript, R, Bash, Go
 - Infrastructure:** Docker, Kubernetes, Helm, CI/CD (GitLab, GitHub)
 - Databases:** PostgreSQL, DuckDB
 - Cloud Platforms:** Google Cloud Platform (GCP), Amazon Web Services (AWS)

LANGUAGES

- French:** Native
 - English:** Bilingual
 - Spanish:** Fluent

PERSONAL PROJECTS AND INTERESTS

- Real Estate Web Application:** Optimization between renting and buying a property with real parameters: *HabitatCalc*.
 - Tax Web Application:** Understanding marginal tax brackets on income and tax rates: *TrancheMaster*.
 - Conferences and Seminars:** *L’Etat dans le nuage 2026*, INSEE and Public Statistical Services Webinars 2024 to 2026, AI Salon 2023, KubeCon 2023, DevFest 2022 & 2023, VivaTech 2022
 - Sports:** Triathlon, volleyball, alpine skiing, bouldering
 - Music:** Piano (4 years), drums (10 years)
